

Add Drawing

If there are imported drawings in the current project, and you want to import another drawing to the current area as the reference, you can use this function.

1. Click **Insert Drawing**, and then select the drawing that you want to insert.
2. Click **OK**, enter the scale, and then the drawing will be inserted to the current drawing area.

Note

1. You can only insert one drawing at one time by using Insert Drawing.

Cubicost- TAS C

2. No name info of the inserted drawing can be generated in the Drawing Manager.
3. In the Drawing Manager, if you delete the name of the current drawing, the inserted drawing will also be deleted simultaneously.
