Draw CAD Line

If there are some incomplete entities in CAD drawings, you can use this

function to make up before identifying.

1. Click **Draw CAD Line**, and then in the Please select the layer window, select

the layer that you want to make up.

S	Select Layer ×	
[Axis	
	Axis Label	
	Column Sideline	
	Column Label	
	Concrete Wall Sideline	
	Masonry Wall Sideline	
	Wall Label	
	Door/Window Opening Sideline	
	Door/Window Opening Label	
	Beam Sideline	
	Beam Label	
	Slab Label	
	Slab Opening Sideline	
	Pile Cap Sideline	-
	Pile Cap Label	
	Pile Sideline	-

2. Draw lines as needed.

Note

1. You need to select the layer on which the element that you want to draw is

located.

2. The lines that you draw are picked lines.
