Export to Excel

Export report data to Excel file.

There are three ways to export data: Export to Excel, Export to Excel File, Export to Existing Excel File.

1. Export to Excel: Export the current report to Excel, and then open and save it in Excel.

2. Export to Excel File: Select a save path, click **Save**, and then a "Report export succeeded." message appears.

The name of the current report is taken as the name of the exported file by default. You can modify it.

3. Export to Existing Excel File: Select an existing save path, click **Save**, and then a "Report export succeeded." message appears.
