

The image shows a screenshot of a Microsoft Word document. At the top, there is a title bar that reads "Microsoft Word - [document name].docx". Below the title bar, there is a large table with multiple columns and rows. The table appears to be a ledger or a data table, with columns for dates, descriptions, and numerical values. The table is mostly empty, with some text visible in the first few rows. The text in the first row of the table is "Date", "Description", and "Amount". The second row contains "1/1/2012", "Initial deposit", and "1000.00". The third row contains "1/2/2012", "Withdrawal", and "500.00". The table continues with many more rows, all of which are empty except for the headers and the first few rows of data.
